M5. Instance vs Static - Employee Class

Week 3 OOP | Category B | Java solution with sample output

Objective

Implement the task using the classes, constructors, access control, references, or static members specified in the uploaded problem sheet.

Java Code

```
class Employee {
    String empName;
    double salary;

    static String companyName = "Bright Horizon Technologies";
    static int employeeCount = 0;

    Employee(String empName, double salary) {
        this.empName = empName;
        this.salary = salary;
        employeeCount++;
    }

    static void printCompanyInfo() {
        System.out.println(companyName);
        System.out.println("Employees on record: " + employeeCount);
    }
}

public class Main {
    public static void main(String[] args) {
        new Employee("Divya", 65000);
        new Employee("Arjun", 0);
        new Employee("Meera", 72000);

        Employee.printCompanyInfo();
    }
}
```

Sample Output

```
Bright Horizon Technologies
Employees on record: 3
```

Concepts Covered

Instance fields, static fields, constructor counters, static methods
